## A World at War for Dust

The year is 1947. The war that started eleven years ago when Japan invaded China, isn't over. As the conflict grew longer, old alliances were broken and new ones were formed. The leading world powers are now aligned in three huge groups: the Allies, the Axis, and the Sino-Soviet Union (SSU). Other than the three great blocs, there are only a handful of countries still hanging on to relative neutrality.

Throughout the world, these three blocs are fighting to gain exclusive control over a new resource known to the Germans as *Vril-Kultur* and the rest of the world simply as VK. This ore has revealed extraordinary properties and brought forth the design of gigantic combat walkers, capable of challenging the world's most advanced tanks.
